

Art. No. 600010-600028 tempusVOLT thin-bed heating mat

The tempusVOLT 230 V thin-bed heating mat is intended for electric surface heating in new build projects and the restoration and renovation of old buildings. It is laid directly under the floor finish. VDE-tested and CE-compliant.

The thin-bed heating mat can be installed with little effort and is ready for connection. The heating conductors are fixed to a self-adhesive woven textile.
