

Art. No. 103257 *tempus*FLAT KLETT DS

**Ready-to-install self-adhesive 2 mm thick and perforated synthetic fibre top layer without installation grid for creating a surface heating system of type A as a composite construction. The synthetic fibre top layer is used to accommodate herotec Velcro pipes in thicknesses of 10 to 16 mm. The lowest installation height is 15 mm.**

The adhesive applied to the back enables fixation on flat surfaces without further aids. This can be done on almost any substrate such as existing screed, ceramic floor coverings, wooden floors or even and smooth concrete ceilings. The substrates must comply with DIN 18202 and be primed according to the specifications of the construction chemistry. Composite constructions require professional planning and processing! In addition to the installation instructions from herotec, the manufacturer's specifications for the selected load distribution layer must be explicitly observed.

Material	Synthetic fibre
Color	grey
Panel dimensions	1000 x 500 x 2 mm
Adhesion	Self-adhesive with release film
Packaging	40 pcs. cardboard / 20m <sup>2</sup>
