

Art. No. 303046 *tempus*FLAT KLETT

Ready-to-install Velcro membrane to accommodate Velcro pipes, for gluing onto insulation laid on site, old screeds, ceramic floor coverings, wooden floors or flat and smooth concrete ceilings.

Thin-layer hook-and-loop system for surface heating as a special construction with thin-layer screeds or for creating surface heating / surface cooling systems in accordance with DIN 18560 and DIN EN 1264. The system element consists of a synthetic fiber cover layer only 2 mm thick with a high hook-and-loop effect when using herotec hook-and-loop pipes. The adhesive applied to the back enables fixation on flat surfaces without the need for any other aids. (Substrates according to DIN 18202 with increased requirements).

Material	Synthetic fiber
Color	gray with black grid
Roll size	1.050 x 20.000 x 2 mm
Usable dimension	1.000 x 20.000 mm
Tolerance	Width: $\pm 2,0$ mm, Length $\pm 0,1\%$, Strength: $\pm 10\%$
Weight	Approx. 300 g/m ²
Melting point (raw material)	> 110 °C
Adhesion	self-adhesive with release film
Laying grid	50 mm and multiples
